UC DAVIS UNIVERSITY OF CALIFORNIA Central Authentication Service (CAS)

Username:

Passphrase:

LOGIN

[Need Help?](#)

Protect your campus computing account login ID and passphrase. Use them only for campus websites and campus online services.

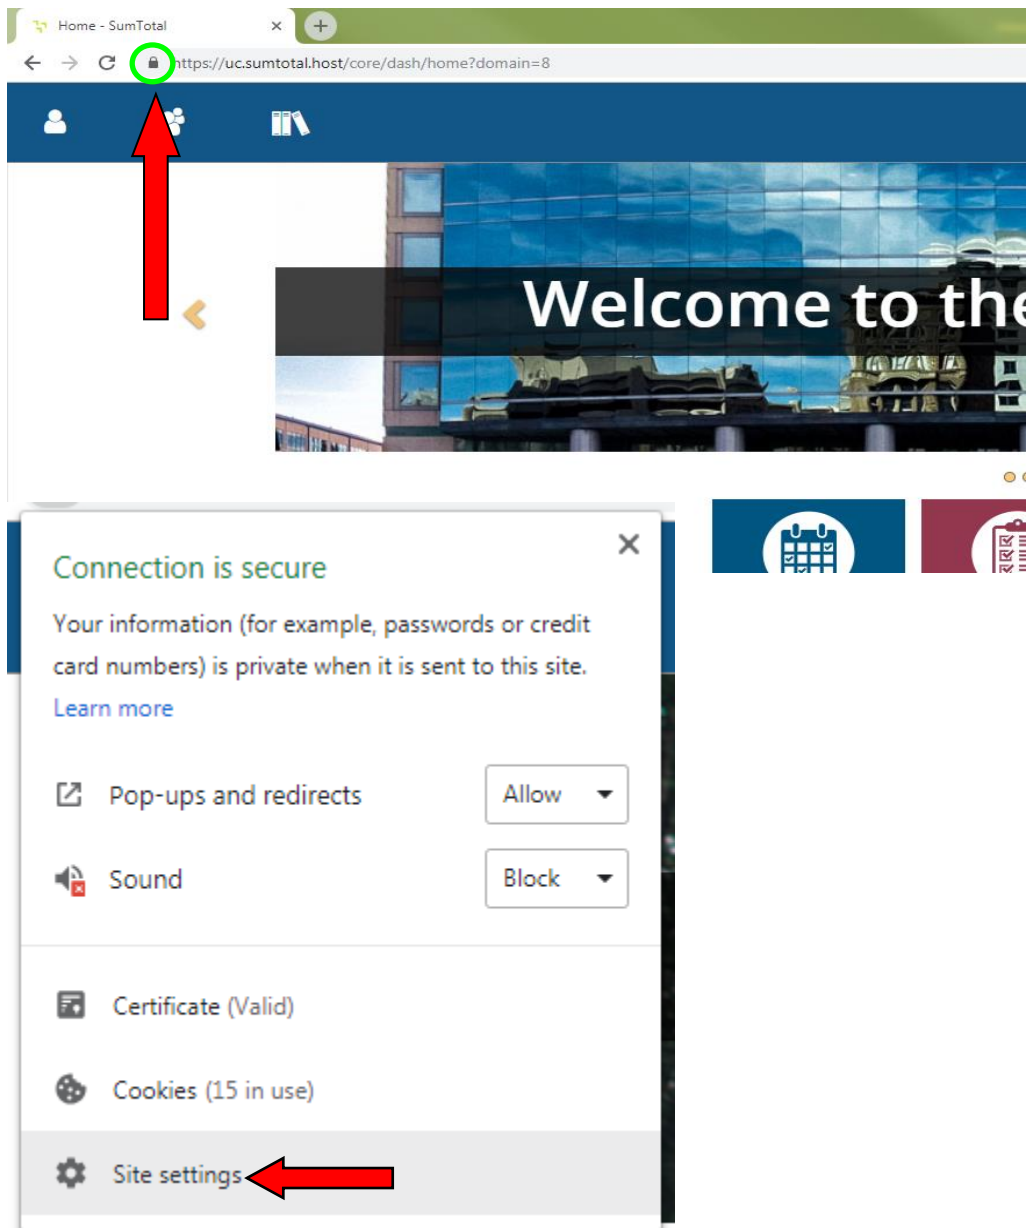

UC Davis will never ask you to provide your passphrase via phone or email. A message that asks you to is probably a phishing scam. Delete it without responding.

Be extremely wary of messages that ask you to enter your passphrase into a non-UC Davis website. If you have doubts about a message or website, or think you have been tricked into submitting your passphrase or personal information, call your local IT service desk:

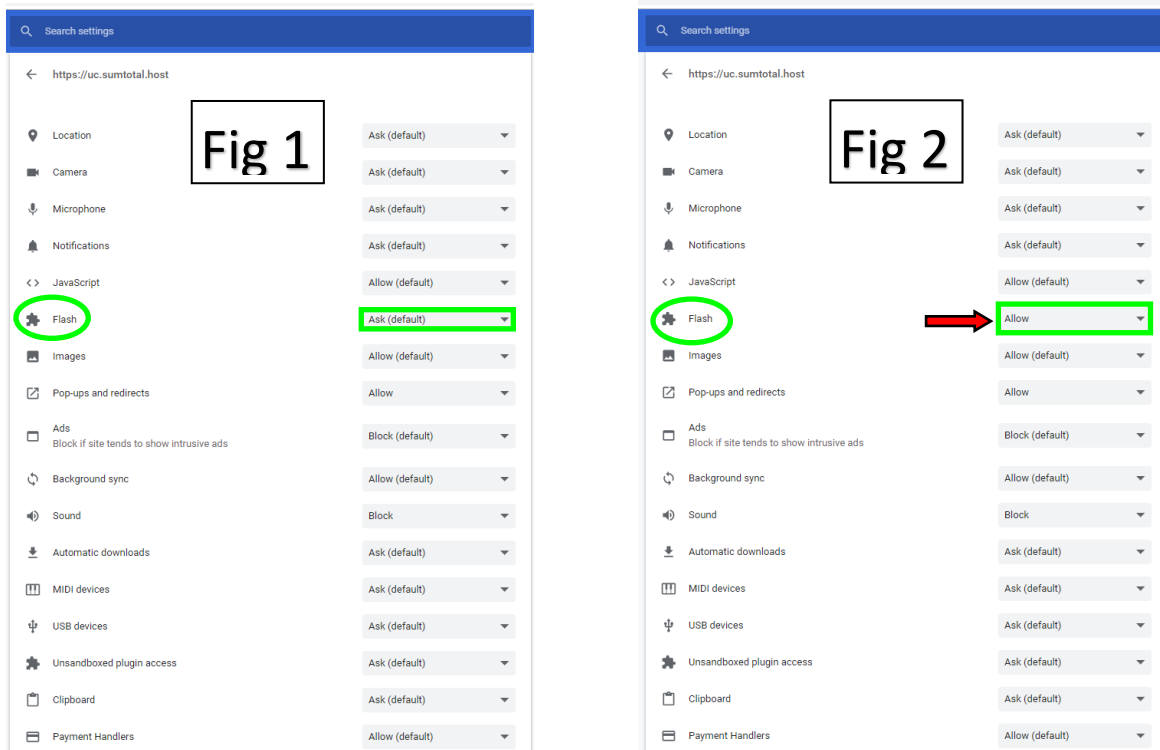

UC Davis Campus IT Express at 530-754-HELP (4357)
UC Davis Health Technology Operations Center at 916-734-HELP (4357)

Click on the padlock icon, just to the right of web address bar and click on “Site settings”

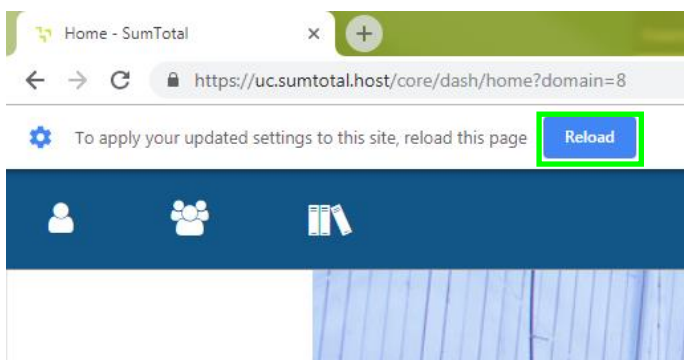

This will open another tab in your browser window, look for “Flash” (Fig 1) and click the drop down box to change “Ask (default)” to “Allow” (Fig 2)

Next, close the settings tab by clicking the “x”

Now that you have returned to the LMS webpage, apply your updated settings, by clicking on the “Reload” button.

To ensure flash settings have been adjusted, you can click on padlock icon next to web address bar and check that flash is set to “Allow”
